

WELLHEAD PROTECTION  
2017 PROGRESS REPORT

- Continue to check for new wells within a one-mile radius of the DWSMA. (Action 1)
- Assist MDH with updating the IWMZ Survey and address identified measures (Action 3)
- Monitor and maintain the 200' radius around the wells to insure that setback distances for new potential contaminant sources are met. (Action 10)
- Identify resource needs of adjoining property owners to meet setback distances and/or manage potential contaminate sources. (Action 11)
- The City continues to be aware of the DWSMA and water quality with Planning and Zoning issues. (Action 13)
- Marshall Lind has attended the Isanti County Local Water Management Committee
- Locate and notify MDH and/or DNR of any new or proposed High capacity wells within 2 miles of the DWSMA. (Action 19)
- Prepared 2016 annual summary of WHP activities for City website, newsletters, and City Hall. (Action 26) – Completed 4/21/16
- Prepare and distribute handout describing WHP activities and the status of plan implementation, through website, welcome packets, and City Hall. (Action 28)
- Distribute informational materials to land owners related to management of Agricultural BMPs. (Action 30)
- Prepare an assessment of WHP implementation every 2.5 years. (Action 31)
- Develop accurate costs for each WHP measures and budget for them. (Action 33)

Respectfully Submitted,

Marshall Lind  
Wellhead Protection Manager
